

Implementing the Common Core State Standards for Mathematics

Post-Webinar Discussion Questions

We recommend that school staff members use these discussion to reflect on where your school improvement grant (SIG) journey has take you so far and where you still want to go.

- What new insights about implementing the CCCSS for Mathematics have we gained from the webinar?
- What are some factors about our context (e.g., size, location, demographics, community involvement, access to professional development, external supports) that might make implementation of CCSS in mathematics challenging?
- What are some factors about our context that can already support implementation of the CCCSS for Mathematics?
- How can we leverage these advantages toward overcoming the identified challenges?
- What next steps will we take based on the information we gained from this webinar and our responses to these discussion questions?
- What resources will we investigate to support our next steps?
